## 100% ECOLOGICAL GOLFING

Mosa Trajectum Golf – Murcia is the first and only completely ecological golf course in all of Spain. A sophisticated drainage system collects all of the rainwater and wastewater at Mosa Trajectum and diverts it into our own purification plant, one of the most modern in Spain. But that's not all: we use 70% less water than other similarly sized golf courses. Specially developed biodegradable foam mixed into the earth reduces the evaporation of water by 70%.

With a total of 27 holes – designed according to PGA and USGA specifications – the Mosa Trajectum Golf – Murcia club allows golfers to play on not just one, but three separate 18-hole courses – depending on their wishes and abilities. Each course is clearly different from the others and offers its own individual challenges.
